Assignment 5 – Final Project Check-in Due: December 5th (11:59pm)

Overview:

This assignment is simply a check in on your final project. You will be graded both on the final assignment (due on the day of the course final) AND on your intermediate progress at this check point. The project is fairly open. The two requirements are:

1. A significant aspect of graphics programming
2. The output should be visibly different than any previous assignment.

You may work together on the final project in groups of 2 or 3. Students working alone will be given less time to present, and are expected to do as much as a those in group.

Project Description (50 points):

Describe your project. List who you are working with, and describe your project goals (~1 paragraph).

Progress Description (30 points):

Describe what progress you made to date. What difficulties you have encountered and how you intend to resolve them?

Image of Progress (20 points):

Attach one or two images highlighting your progress so far.

Submission Details:

Submission should be in the form of a link to a webpage.
